Frequently Asked Questions

Q. Is it possible to use it in strong wind?

A. Due to the weight, the fire sail can be used in strong winds

Q. What kind of certification does it have?

A. Because there is no standard for fire sails there is no certification for the fire sail itself. However, the fire sail is tested extensively by Norwegian and international fire departments with very impressive results

Q. What kind of maintenance does it need?

A. Maintenance is not necessary.

Q. How do you roll it together after it has been used?

A. There is a video explaining this. The video is located under the video folder on the distributor site

Q. Who should have the Inferno Block Fire Sail?

A. The Inferno block fire sail is suitable for all types of wooden buildings. The ultimate pop up solution to prevent fire from spreading between buildings. The wall that has this fire sail mounted on, is normally the last wall to fall down. This makes the wall a great firewall and is perfect for listed buildings areas, communities, industry, and buildings threatened by forest fire. Also, an ideal tool for any fire department
